Please return the claim for credit, evaluation forms and name badges to the registration desk. Instructions to claim credit are listed in the verification document posted by the registration desk and linked on the conference website.

CREDIT STATEMENTS

This activity has been planned and implemented in accordance with the accreditation requirements and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint providership of the American Academy of Pediatrics (AAP) and the Montana Chapter of the AAP. The American Academy of Pediatrics is accredited by the ACCME to provide continuing medical education for physicians.

- The AAP designates this live activity for a maximum of 15.0 AMA PRA Category 1 Credit(s)™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.
- This activity is acceptable for a maximum of 15.0 AAP credits. These credits can be applied toward the AAP CME/CPD Award available to Fellows and Candidate Members of the American Academy of Pediatrics.
- PAs may claim a maximum of 15.0 Category 1 credits for completing this activity. NCCPA accepts AMA PRA Category 1 Credit™ from organizations accredited by ACCME or a recognized state medical society.
- This program is accredited for 15.0 NAPNAP CE contact hours of which 0 contain pharmacology (Rx) content, (0 related to psychopharmacology) (0 related to controlled substances), per the National Association of Pediatric Nurse Practitioners (NAPNAP) Continuing Education Guidelines.

MOC Statement:
- Successful completion of this CME activity, which includes participation in the evaluation component, enables the learner to earn up to 10.0 MOC points in the American Board of Pediatrics’ (ABP) Maintenance of Certification (MOC) program. It is the CME activity provider’s responsibility to submit learner completion information to ACCME for the purpose of granting ABP MOC credit.
Roundup Speaker Bios

**Jonathan S. Litt, MD, MPH, ScD**

Dr. Litt is a practicing Neonatologist and health services researcher at Beth Israel Deaconess Medical Center, Director of the NICU Growth and Developmental Support Program at Boston Children’s Hospital, and Assistant Professor of Pediatrics at Harvard Medical School and Social and Behavioral Sciences at the Harvard TH Chan School of Public Health. His body of research is focused on the long-term health and neurodevelopmental outcomes of high-risk infants, the role of care integration and population health management in novel models of high-risk infant follow-up, and the equitable access to and effectiveness of community-based intervention services for children with medical and developmental complexity.

**Kee Dunning, MS, MEd, LCPC, LMFT**

Kee Dunning is a well-known and highly regarded therapist and educator. She specializes in providing insights, guidance and unconditional positive regard in teaching communication skills to a variety of audiences. Kee’s professional career as a counselor has taken her on a unique path, working with diverse at-risk populations including the Montana State Women’s Prison and in a youth in-patient psychiatric unit. Kee has received many accolades for her work including being named a Young Women’s Club of America (YWCA) Salute to Women recipient.

**Dr. Christopher D. Baker, MD**

Dr. Baker is a Professor of Pediatrics in the Section of Pulmonary and Sleep Medicine at the University of Colorado School of Medicine. He is the Medical Director of the Ventilator Care Program at Children’s Hospital Colorado which provides comprehensive care for infants and children with tracheostomies and home mechanical ventilation. He is a recognized expert in the fields of chronic ventilation and bronchopulmonary dysplasia, the chronic lung disease of prematurity.

**Dr. Benjamin Prince, MD, MSCI**

Dr. Prince is Board-Certified in Allergy and Immunology and serves as the Associate Division Chief of Research of the multidisciplinary Hemo-Immuno-Lymphoproliferative (HILP) clinic at Nationwide Children’s Hospital. While he treats children with a variety of allergic and immunologic conditions, his areas of interest are in food allergy and inborn errors of immunity.

**Dr. Stephanie Gilley, MD, PhD, FAAP**

Dr. Gilley is a board-certified pediatrician, certified physician nutrition specialist, Ph.D. scientist, and Assistant Professor at the University of Colorado School of Medicine in the Section of Pediatric Nutrition. Her research interests are focused on understanding the earliest origins of health and disease and how we should feed infants and toddlers based on their intrauterine exposures. Her top
three favorite micronutrients are iron, vitamin C and zinc. She loves being outdoors with her family in Colorado, eating, and water sports.

Dr. Hugh Bigg, MD, DO

Dr. Hugh Bigg, DO, is an Assistant Professor and outreach pediatric and fetal cardiologist living and practicing in Billings, Montana. He is a member of the division of pediatric cardiology at the University of Utah and has advanced training in pediatric, transesophageal, and fetal echocardiography. He sees patients with all forms of both acquired and congenital heart disease from fetal diagnosis through late adolescence. His clinical interests include general pediatric cardiology, detection of congenital heart disease before and after birth, arrhythmia diagnosis and management, educating patients and their families, medical education, community engagement, and understanding cultural determinants of health.

Dr. Lori G Byron, MD

Dr. Byron practiced pediatrics for 27 years on the Crow Indian Reservation. Now retired from Indian Health Service, she continues to work as a Pediatric Hospitalist in a private hospital and works largely on environmental issues.

Melissa Murri

Melissa is from Billings and is a parent of a child with FoxG1, a rare genetic disorder. Shortly after birth her daughter was found to have vocal cord paresis in the closed position and, at three months old, was flown to Colorado Children’s Hospital for a tracheostomy. Her daughter later had a g-tube placed. They have experienced multiple hospitalizations, both in Billings and Colorado.

Bailey Tolson

Bailey was born and raised in Missoula where she graduated from the University of Montana with a degree in Health and Human Performance; Applied Health Sciences. She and her husband have been married for 12 years and share three wonderful and unique daughters.

The youngest has a primary diagnosis of a rare brain malformation called Lissencephaly. As her primary caregiver, Tolson coordinates all medical and therapy appointments and attendance. Her daughter requires full time care with a feeding pump, multiple durable medical equipment and medication administration. “She is TRULY a gift to our family and we are all here to support her,” Bailey said.

Erin Hoch

Erin is from Kalispell and a mama to a medically complex child with Infantile Pompe Disease. The journey has been a constant battle for everything her son needs and she's determined to make it better for other families coming into a new diagnosis and needing support. She wants to give something to others she did not receive and help others feel confident in the steps they have to take for themselves and their children.
